

STOP

STOP WASTE. GO CIRCULAR.

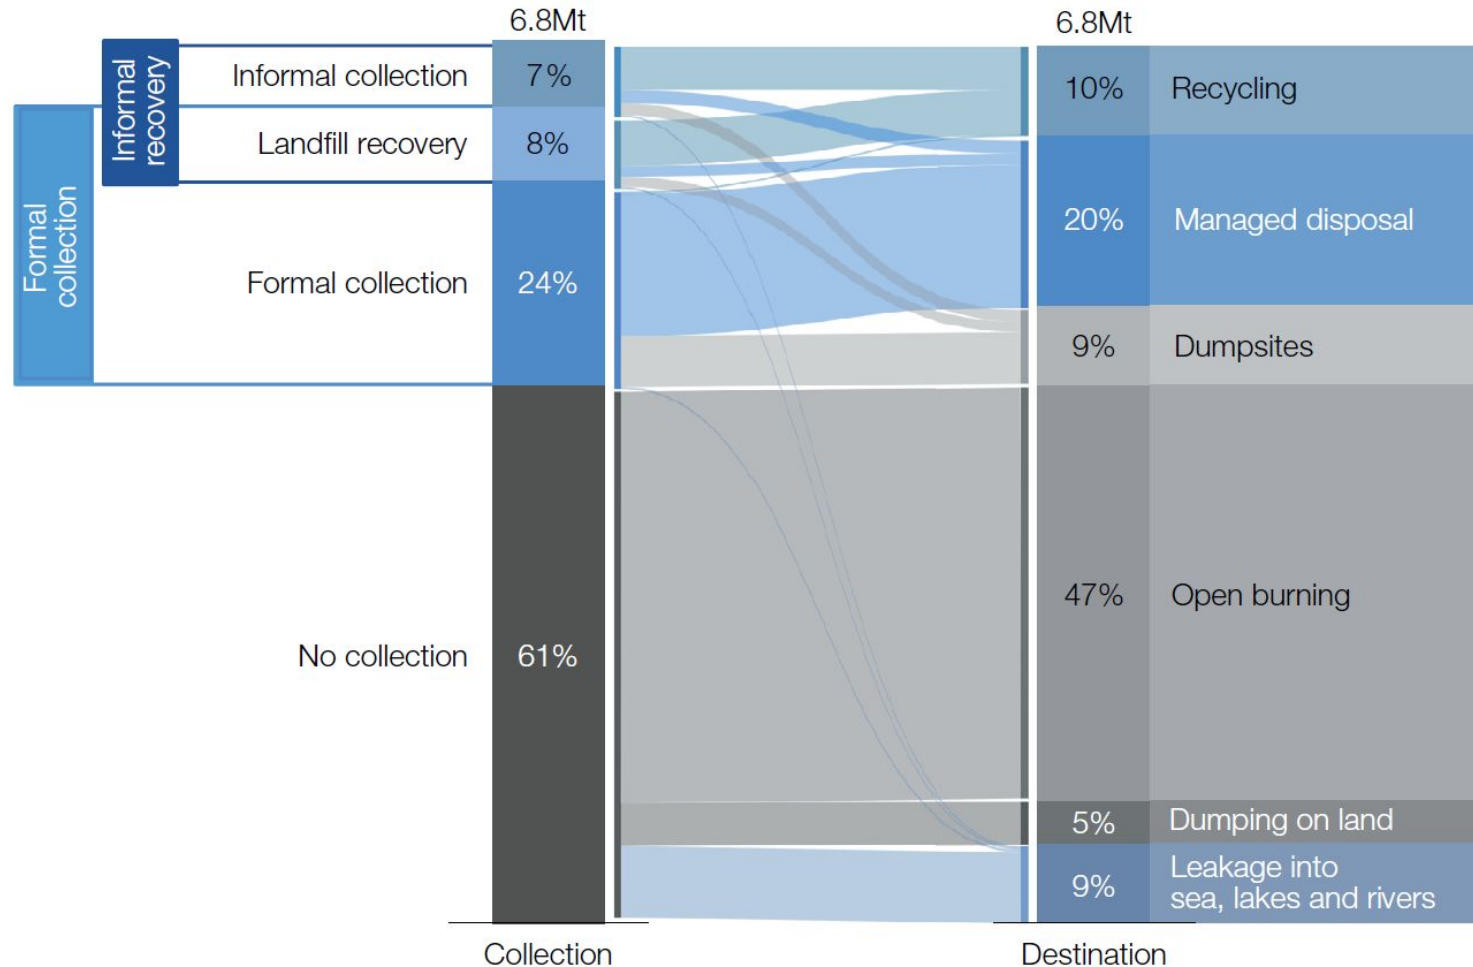

Building Indonesia's First Regency-Wide Circular Waste System

Markus Horcher
VP Sustainability & Public Affairs
Borealis GmbH

7th Go Circular Business Summit
Mannheim, March 26th, 2026

More than 60% of Indonesia's waste remains unmanaged, polluting nature and impacting people's health

Plastic waste generated per year in Indonesia

Expanding from village to regional scale

In support of Indonesia's ambition, Project STOP is now scaling up to become the first regency-wide solid waste management program

Indonesia's waste management targets*

BASELINE 2025

- Waste handling **24%**
- Recycling rate **16%**

TARGET 2045

- Waste handling **90%**
- Recycling rate **35%**

Project STOP locations: from village to regency scale

Addressing the complex issue of mismanaged waste

Project STOP is applying a system-enabler approach to drive a sustainable transformation towards a circular economy in Indonesia

Committed regional government and supporting policies

Scalable and fit-for-purpose waste management system design and infrastructure

Capacity and knowledge building

Behavior change campaigns

Digital innovation

Valorisation of recyclables

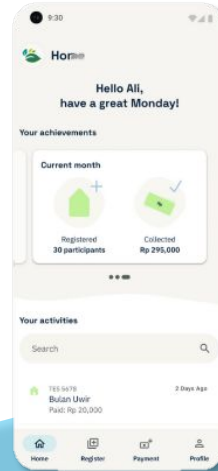

'Start small, scale fast' approach as recipe for success

Following hand-over of three sites, we now scale-up towards regency scale

2022: Project STOP Muncar, Pasuruan and Jembrana handed over to local governments

2024: Launch of Banyuwangi Hijau app with Accenture for digital registrations and payment collections

2026: Ground breaking for the second MRF in Keratan

2023: Launch of Project STOP Banyuwangi and opening of Balak MRF (sorting facility)

2025: Clean Rivers joins as scale-up partner for Phase 3

2028: 2 million people with access to waste management

2017: Inception

On track to provide waste collection access to 2 million people

Project STOP demonstrates impact on the ground minimizing waste leakage into the environment and delivering tangible benefits to communities

772,000 people have access to formal waste collection

>100,000 tons of waste collected since inception

276 local green jobs created

Bringing together government, private sector, non-profits and academia

Our partnerships enable successful and sustainable system change
